

What International YOU Taught Me

There lies a force in each of us: we just have to be strong enough to accept it. I learned that **I am strong**; so strong that **I can make a difference**. And now I know that I can only do this by showing the world who I am, by not being afraid to let others see the real me.

I am human and I can make mistakes. The important thing is to learn something from them and accept them.

When I left Unity Village I knew I had new friends—friends for life. **I got a part of each of them and they have a little piece of me**. And wherever we go, we take the others with us and they carry us with them.

IYOU is that one lifetime moment that anyone would like to live over and over again. But just like all the best moments in our lives it remains **a memory**, one **so strong that it influences you forever**. It makes you realize the power you are.
