

SPIRITUAL CONSCIOUSNESS

ORIG. Mss.

(1)

In spiritual con-
sciousness ~~is neither~~
~~beginning nor ending,~~
the limitations of
matter and material
things ~~is~~ has no
existence. "Time shall
be no more" is our

of the fundamental
 statements of those
 who function in
 spirit. When one
 rises to this mountain
 of high understanding
~~we are not cautious of~~
~~the things that make~~
~~time upon what~~
~~relation we count~~

~~and time is postulated~~
 he is no longer con-
 scious of the things
~~upon which~~

no the relation of
 things upon which
 time is postulated,
 James was in
 such a state of mind
 when he said, "Before

the world was I am,
 This "priest of God" has
 "no ~~reiter~~ beginning of days
 nor end of life, but
 made like unto the
 Son of God." "There is
 a spirit in man and
 the inspiration of the
 Almighty giveth them

Understanding". That we
 are not ordinarily
 conscious of the Kingdom
 of God within us is
 no good argument
 against its existence.
 We are unconscious of
 thousands of ~~things that~~
 activities visible and
 invisible because we

Cultivate the ^{latent} ability ⁽⁶⁾
through which we may
take cognizance of
them. By ~~various~~ ~~systems~~
of mental discipline we
~~may~~ can throw ourselves
into many planes of
consciousness in ^{spirit,} soul
and Body, of which we
are now ignorant.

Physical science ever
 is concerned to a state
 in which there is no
 limitation of matter as
~~equivalence of matter~~
 now estimated
 as it is now ~~estimated~~.

The limit of all velocities
 of a physical nature
 is placed at 186,000
 miles per second. This

is the velocity of light,
and from a physical
standpoint no effect
could ~~be~~ possibly be

propagated faster. ~~at~~
Beyond ^{matter disappears}
this speed ~~physiological~~

~~processes~~ ~~ceases~~ and,

so far as physical
activities are concerned,
suspension animation ensues.

But spiritual activities
are not limited to
186,000 miles per second.

~~The~~ Spirit reverses the
whole process of material
energy. Instead of estimating
the relation of the
universe ~~by~~ ^{through} atoms
or electrons, the

spiritual scientist
concerns the ideas
which
