Healing II Kings 4:25-37

Silent Prayer:
It is well with my soul when I trust in Thee.
What is disease?
What is the cause of disease?
What is sin?
Where is the seat of disease?
How can disease be healed?
What advantage does spiritual healing have over medicine healing?
Can all diseases be healed? What about organic diseases? Why are some healers more successful than others? How many forms of disease are there? What do part do of formations and demoral play in spiritual healing?
Giving importance to a thought of disease causes it to be puffed up with pride, which is swelling in the flesh. Hence all swellings represent a puffed up fleshly idea. The remedy is a mitotome of all importance from the condition, sprains, etc.
What is the highest healing thought?

The realization that divine mind is everyone present as a constructive power, loving to do the will of man. How can we apply this thought to the healing of the body?
By beholding in our inner spiritual consciousness, it is divine Mind working in every part of the body, to the end that the body may be a perfect representation of God's idea of a spiritual body. Job 18:5, "Yet in my flesh I see God."
If you want to know about life study life, not death.

"Why seek ye the living among the dead."
Study the real and you will find out the relation of the unreal.

Study health and you will know all that is necessary for your own about disease.
To cultivate the thought that through death people go on to a higher life leads to separation of soul and body. Thousands of people die every year because of it's longing for some
form of a higher and better life after death. This is separation of soul and body - error and sin. It's an ignorant concept of the mind and shouldn't be treated like any other disease.
I am the Lord that healeth thee. - Exo. 15:26.
I cried unto thee and thou hast healed me. - Psa. 30:2
Neal - Hebrew, to repair.
Neal - Greek, to make sound or whole.
Neal - English - Hall, heart whole.
